

MORGAN HALL AT WILLIAMS COLLEGE  
WILLIAMSTOWN, MA

BLACK RIVER DESIGN  
23,650 SQUARE FEET

Morgan Hall is a historic stone dormitory located at Williams College. It was recently completely renovated. The old steam heating system was replaced with a modern hydronic system. Buderus Steel panel radiators were used throughout the building. Each room was zoned individually using self-contained non-electric valves. Heat was provided by a steam to water heat exchanger. The building was fitted with new plumbing fixtures throughout.
